

# Fast-track manufacturing and delivery

Whether the ball valve is from stock, modified stock or manufactured under license for your fast-track requirements, we have the solution for you!

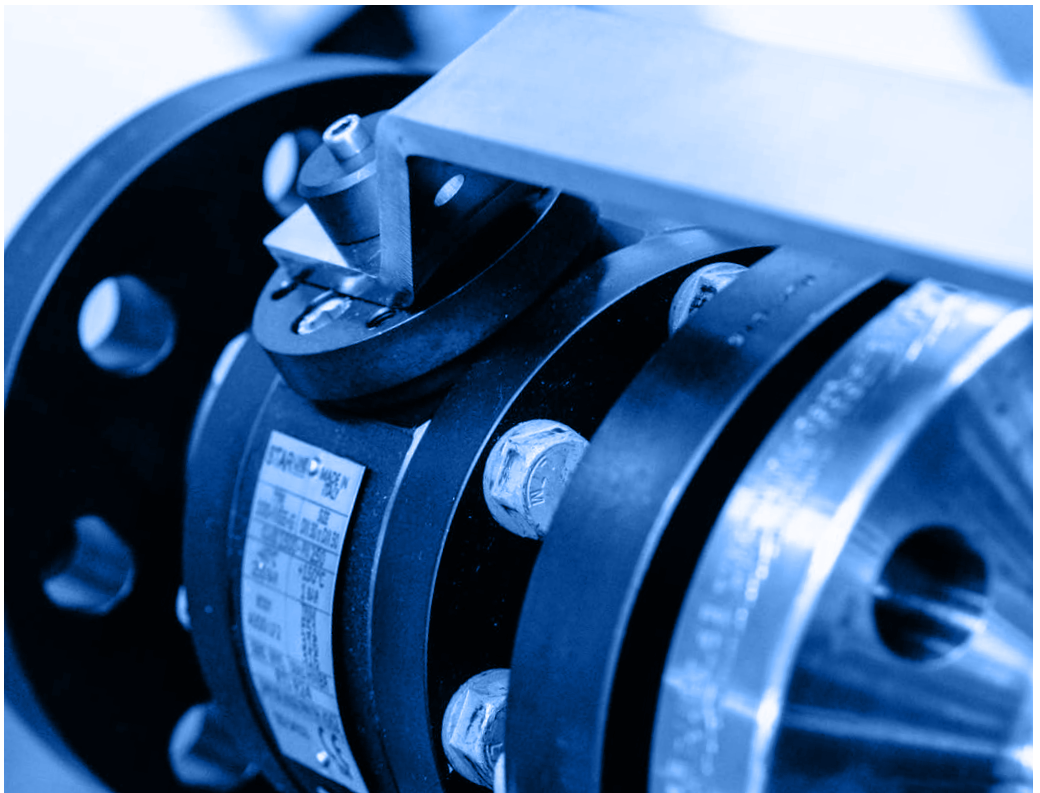

### **A proven partnership**

Starline Italy and Starline Ball Valves UK have been partners for more than 20 years, helping to develop and supply high quality, 100% Western European forged ball valves. We supply to many industries and applications, including oil & gas, petrochemical, and many others; our product range holds many world-wide approvals. The Starline zero leakage ball valves are also ideal for green energy supply, suitable for medias such as hydrogen and pyrolysis.

### **About AC Valve Alliance**

Our engineering team have a wealth of experience in the valve industry, from design engineering to production and sales, in both valve manufacturing and distribution. This expertise is used by the AC Valve Alliance Group companies to provide greater flexibility to its customers, with the ability to completely reengineer stock to suit specific technical requirements, or site demands.

### **Starline Italy factory supply**

If factory lead times are acceptable for your project, we can offer Starline ball valves tailored to your specialist requirements from their factory in Italy. Due to our close supply partnership with Starline S.p.A., our team of experts work together with Starline Italy to find the best solution for our customers.

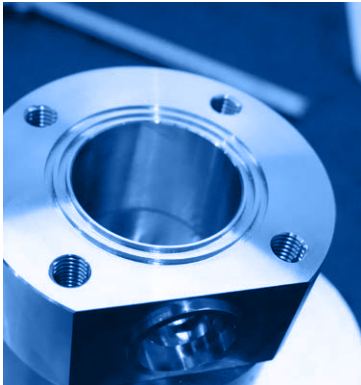

### **European stock holding**

Our Starline stock range of floating and trunnion mounted ball valves is one of the largest and most comprehensive in Europe, and we're proud to offer our products to customers worldwide. Stock options are available for fast-track delivery from either our dedicated warehouse in the UK, or The Netherlands. Our products come tested with full traceability to meet your specification needs.

### **In-house modification**

Working with Starline Italy, we stock a comprehensive range of OEM spare parts which enables us to offer replacement components when required. We also offer upgraded materials for more complex applications to solve a wide range of technical issues. Our workshop offers full after-market support, including repairing, refurbishment and retesting for our products.

# Manufacturing in the UK

Operating as Starline Ball Valves UK, AC Valve Alliance has provided high quality products to the market with valuable stock and valve modification services for over 20 years.

Due to the close partnership between Starline Italy and Starline Ball Valves UK, we have formed a unique manufacturing partnership by which, under license, we are able to offer Starline ball valves manufactured exclusively in the UK.

## **Bespoke floating ball valves**

For unusual requirements including specific ends or face to face length

Exotic materials/high alloys such as Inconel, Super Duplex, Titanium, Aluminium Bronze or Hastelloy

## **To suit your requirements**

Special material test certifications

Special configurations

Fast delivery requirements

# Speak to a Product Specialist

## Starline ball valves

### Overview

High quality forged valves  
Fully European  
Sizes 0.5" to 36" #150 - 2500

### Features

High/low temperature  
High/low pressure  
Floating ball design  
Trunnion mounted design  
Single block and bleed  
Double block and bleed  
Metal seated  
Cryogenic  
Duplex

### Applications

Oil, gas and petrochemical  
Hydrogen  
Clean energy  
Pyrolysis

### Worldwide references and approvals

Project supply for TotalEnergies  
Shell  
KOC  
PTTEP  
INPEX  
ADCO  
ExxonMobil  
Technip

6 Interlink Way South  
Bardon Hill  
Coalville  
LE67 1PH  
United Kingdom
