

Project supply solutions

Simplifying your project

Product sourcing

Our experienced Projects Team works with your AVL to deliver projects on time, within budget, and to specification. We source high-quality valves and actuators from exclusive principal supply partners, ensuring compatibility across industrial applications and meeting the highest standards of quality and performance. These partnerships keep us at the forefront of evolving demands for new materials, testing, and approvals.

In addition to our principal supply partners, we source from select Asian manufacturers in India, China, Taiwan, and South Korea, maintaining our strict "AC Valve Alliance Approved" standards. Our team conducts factory visits, supplier evaluations and inspections with local experts, overseeing project management, documentation and logistics to guarantee full product traceability.

Documentation

At AC Valve Alliance, we prioritise thorough documentation. Our Project Document Controllers ensure all documents meet your needs, tracked through our Project VDRL system. We review and approve documents in-house, providing transparency, traceability, and accountability. Comprehensive documentation guarantees precise and reliable fulfilment of all requirements, ensuring compliance and efficient troubleshooting.

Our product offerings

Manual and actuated valves
Ball valves
Gate valves
Globe valves
Check valves
Butterfly valves
Plug valves
Safety relief valves
Control valves
Relief valves

Our in-house valve engineering and automation centre manages and delivers projects, or we can expedite, inspect, and dispatch directly from the manufacturer's facilities to suit your needs.

Group services

Our enhanced workshop facilities ensure we're positioned to offer a rapid, personalised response and ready to solve a wide range of engineering issues.

- Valve automation
- Skid / module design and manufacture
- In-house machining
- Laser etching / tagging
- Valve design and manufacture
- Pressure testing
- Welding and fabrication
- Blasting and painting
- Non-destructive examination
- Training
- Valve upgrade, modification and repair
- Project consolidation
- Full product documentation and certification
- Fire testing
- Fugitive emissions testing
- Large valve and actuator stocks for fast delivery

Benefits of our project supply solutions

- Comprehensive valve and actuator sourcing
- Experienced project management team
- Flexible delivery options
- Robust documentation support
- Access to approved manufacturers

Our team of experts can support you with

- Large scale project management
- Product selection, sourcing and purchasing
- In-house testing
- Expediting
- Automation
- 3D CAD design
- Documentation
- Inspections and testing
- Logistics
- Spares and stockholding

Industries we work with

- Oil & gas
- Pyrolysis
- Hydrogen
- General process
- Carbon capture
- Nuclear
- Geothermal

Project supply process

You expedite in one place, we do the rest

Cost-effectiveness

Expertise

Customer care

1

Enquiry receipt

When we receive your enquiry, we review the project scope and specifications.

2

Quotation

We'll prepare your quotation based on size and complexity, offering customisable formats for ease of your review and processing.

3

Order receipt

When you place the order, we will begin processing. This involves a contract review, an internal kickoff meeting, and the raising of the order acknowledgment and sub-orders.

4

Order management

Order management is critical to our process. Efficiently tracking and fulfilling customer orders ensures customer satisfaction and operational integrity.

5

Documentation

Our Project Document Controllers ensure all documents meet your preferred format, tracked through our Project VDRL system. This includes the final manufacturing record book (MRB) with all relevant certifications and reports.

6

Quality control

Our quality team will review the hardware against the project order and will perform inspections prior to valves being packed.

7

Packing

We will pack the project according to your requirements or project specifications. We can provide cartons / pallets or full ISPM15-certified packing cases.

8

Logistics & shipping

We are able to organise the logistics of shipping your valves anywhere in the world. Once final weights and dimensions are known, we work with reputable global logistic companies to ensure the safe arrival of your equipment.

Direct dispatch from within the EU

Our new warehouse in the Netherlands strengthens our service across Europe, enabling faster, more efficient operations and improved accessibility. Benefit from:

Local stock

Quick access to EU-based inventory for seamless order fulfilment

Enhanced support

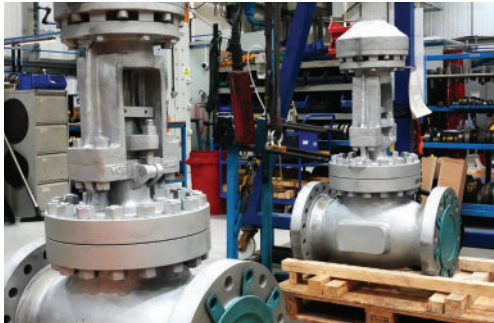

Personalised service with expert knowledge of your requirements

Faster delivery

Expedited shipping to keep your projects on track

Cost savings

Reduced costs, making our products more accessible
